This one-day symposium will address the theme of *Nurses Transforming Healthcare Through Innovation*. There will be time for the participants to interact with the speakers and network with their colleagues to share insights and experiences throughout the day. Each speaker will offer new and different ideas for improving the nursing workflow through informatics practice and patient care. Ideally – less documentation, streamlined documentation and offloading non-clinical tasks, optimal E.H.R., models to drive improved patient care outcomes through shared governance and digital transformation using informatics with a focus on improving the clinician and consumer(patient) experience. In addition, dedicated time will be set aside for moderated poster presentations and exhibitors.

There will be time for you to interact with the national and local presenters and network with your colleagues to share insights and experiences throughout the day.
